

Work Health & Safety Alert

The WorkCover Authority of NSW is currently conducting site visits to Hotels and Clubs throughout NSW.

This is due to the recent serious injuries relating to beer line cleaning and cellar management procedures.

WorkCover is focusing on cellar safety procedures as a result.

Many venues throughout NSW have already received a visit and feedback to date indicates a marked variation in how effective pubs and clubs manage their Work Health and Safety obligations.

Austrain Academy has been able to assist a number of hotels and clubs across NSW with these inspections by providing a Work Health & Safety Management System that is aligned to the Work Health & Safety Act & Regulations.

Austrain Academy also provides mentoring, support and training with the WHS Management System to ensure your venue meets all requirements.

If you are unsure if your venue is compliant or if your venue has been the subject of a WorkCover inspection and you require assistance, please contact us for a WHS appraisal:
